

# MX-2000 Automatic Glycol Feed System

## Overview:

The Model MX-2000 Glycol Feed System is designed for closed loop glycol makeup applications. Each system is self contained and installation is easy. Simply wire your 120V power supply to the Nema 1 control panel, and connect to the 1/2" FNPT discharge connection.

## Features:

- Polyethylene Tank
- 120 VAC
- Fully Automatic
- Completely Assembled
- Includes pressure switch, pressure gauge, relief valve, isolation valves, level switch and shut off valves
- Shipping weight: approx. 200 lbs
- Easy Installation

## Options:

- 1/4 HP Mixer and Bracket
- Low level audible alarm and silencer

## Model Numbers:

Model MX-2045	45 Imp Gallon System
Model MX-2100	100 Imp Gallon System

## Options:

1/4HP Mixer with mounting bracket	-MIX
Low tank level audible alarm and silencer	-LLS

## Operation:

Fill the tank with glycol solution. Adjust pressure switch settings as required..

Manual override feed is also provided.

A level switch is provided in the tank and wired to shut down the pump and sound an alarm. An optional alarm will sound if the pressure drops and glycol is required. There is a silence button provided for operator convenience.
