

CLN-1010 NEUTRAL pH CLEANER

DESCRIPTION

Glengarry CLN-1010 Neutral pH Cleaner is formulated for the removal of oil, grease and other suspended material from new recirculating water systems. CLN-1010 is a surfactant based cleaner and consists of surfactants, wetting agents and dispersants. CLN-1010 also contains nitrites as a corrosion inhibitor and passivating agent during the cleaning process.

CLN-1010 is compatible with most common water treatment and is effective over a wide range of temperature. This cleaner contains no acids or phosphates and is relatively safe to handle.

CLN-1010 is concentrated liquid product with an opaque white appearance and the following characteristics:

pH:	8.5 to 9.5
S.G.:	1.00 to 1.05

APPLICATION

CLN-1010 is normally fed to the system at a nominal dosage rate of 5 Imperial gallons per 1000 Imperial gallons of system water. The cleaner is more effective at higher temperature greater than 50°C.

The system is then recirculated over a period of time. After cleaning is complete the system is

drained to remove the contaminants and any suspended solids. The system should then be refilled and flushed to remove the residual cleaner and any other suspended materials. Strainer baskets should be examined and cleaned.

After cleaning the system should then be refilled with clean water and treated with a Corrosion Inhibitor.

AVAILABILITY

20 Litre Pail

205 Litre Drum

HANDLING PRECAUTIONS

Wear the appropriate safety equipment before handling any chemicals. For further information, please refer to the Material Safety Data Sheet.
