

## **CT-2000 COOLING WATER TREATMENT**

### **DESCRIPTION**

Glengarry Chemical Ltd. CT-2000 Cooling Water Treatment is an organic based scale and corrosion inhibitors specifically designed for recirculating cooling tower systems. CT-2000 is a low pH product consisting of a blend of zinc phosphonates, polymeric dispersants and azoles. The phosphonates and azoles are designed to inhibit corrosion on both steel and copper found in the system. The polymeric dispersants are designed to prevent scale formation from occurring and to keep the system surfaces clean.

CT-2000 is a concentrated liquid product that is convenient to use. The product is compatible with most commonly used biocides for microbiological control. It is clear brown in appearance, with the following characteristics.

Specific Gravity: 1.10 – 1.15

pH: 1.0 – 2.0

### **FEEDING PROCEDURES**

CT-2000 can be fed neat from the shipping container by means of chemical metering pump controlled by a water meter and timer. The product

can also be diluted for better control of chemical feedrates.

### **AVAILABILITY**

20 Litre Pail

205 Litre Drum

### **HANDLING PRECAUTIONS**

Wear the appropriate safety equipment before handling any chemicals. For further information, please refer to the Material Safety Data Sheet.
