

CT-3000 COOLING WATER TREATMENT

DESCRIPTION

Glengarry CT-3000 Cooling Water Treatment is product specifically designed for recirculating cooling tower systems using ozone for biological control. CT-3000 is a low pH product consisting of a blend of molybdates, polymeric dispersants and azoles. Molybdates are more effective in an strong oxidizing environment. The chosen polymeric dispersants are more resistant to the strong oxidizing environment and are designed to prevent scale formation from occurring and to keep the system surfaces clean.

CT-3000 is a concentrated liquid product that is convenient to use. The product is compatible with most commonly used biocides including strong oxidizers for microbiological control. It is clear straw colour in appearance, with the following characteristics.

Specific Gravity: 1.13 – 1.15

pH: 1.0 – 2.0

FEEDING PROCEDURES

CT-3000 can be fed neat from the shipping container by means of chemical metering pump

controlled by a water meter and timer. The product can also be diluted for better control of chemical feedrates.

AVAILABILITY

20 Litre Pail

205 Litre Drum

HANDLING PRECAUTIONS

Wear the appropriate safety equipment before handling any chemicals. For further information, please refer to the Material Safety Data Sheet.
